

Occupy Los Lunas

We protest peacefully to attain a voice in the political process that has been influenced too heavily by wealth and no longer represents our interests. We do this so that we may leave the world a better place than we found it. To do otherwise is a crime.

We want to restore a representative democracy and encourage people to join the conversation. We advocate for systems that support economic justice, and a sustainable political structure, society, and world.

We formed Occupy Los Lunas because...

rev: 11/24/2014

- ★ We love our country and are non-partisan because politicians of both parties too often oppose our interests
- ★ We believe in capitalism with limits and regulations.
- ★ We believe in non-violent protest.
- ★ We believe that corporations are not people and laws must be rewritten to get the money out of politics.
- ★ We are outraged that the government no longer represents the real people in our country - the 99% - due to the corrosive effect of money in politics
- ★ We believe that the economic crash didn't "just happen", it was largely caused by the actions of a few. The cause has yet to be addressed and the people responsible have not been brought to justice.
- ★ We are concerned with the loss of upward mobility and would like to see all Americans have economic opportunities through hard work and education.
- ★ We believe a strong country and economy that must be based on a strong Middle Class. The concentration of wealth and power into fewer and fewer hands contributes to an unhealthy economic and political arena.
- ★ We oppose the policies from both parties that support warfare and conflict around the world.
- ★ We believe that the mainstream media has done a poor job of framing the national debate about the bribery of Congress and the opposition of this corruption by Occupy
- ★ We believe that every major social change in our history has been successful only after a sufficient number of people became active in advocating change.

We advocate for a Constitutional Amendment to...

- ★ Terminate corporate personhood status and define money as *not* protected speech
- ★ Reform campaign finance through public campaign financing and free broadcast time to vetted candidates
- ★ Require all voting to be in a process that allows for auditing and recounting of each vote
