

Occupy Los Lunas

We protest peacefully to attain a voice in the political process that has been influenced too heavily by wealth and no longer represents our interests. We do this so that we may leave the world a better place than we found it. To do otherwise is a crime.

We want to restore a representative democracy and encourage people to join the conversation.

We advocate for systems that support economic justice, and a sustainable political structure, society, and world.

We formed Occupy Los Lunas because...

- ★ We love our country and are non-partisan because politicians of both parties too often oppose the interests of those they are supposed to represent.
- ★ We strongly oppose the very similar policies and endless wars of both the Democratic and Republican Parties.
- ★ We believe in capitalism with limits and regulations.
- ★ We believe in non-violent protest.
- ★ We believe a strong country and economy must be based on a strong Middle Class.
- ★ We believe that the economic crash didn't "just happen", it was largely caused by the actions of a few, and the cause has yet to be addressed.
- ★ We are concerned with the loss of upward mobility and would like to see all Americans have economic opportunities through hard work and education.
- ★ We believe that the mainstream media conspires to keep people from knowing the truth about the importance of the Occupy Movement and the bribery of Congress.
- ★ We believe it's time We The People take our country back from special interests through public campaign financing and elimination of corporate personhood.
- ★ We believe that every major social change in our history has been successful only after a sufficient number of people became active in advocating change.
